

## It's a lot easier with colour.

Moving things to the right place is easier with colour. And when one of your customers needs to get their hands on a file quickly and easily, they'll be thankful that they have AVERY Shelf Lateral Filing.

After all, its cleverly designed colour-coding system helps get things noticed fast. That's because the human eye distinguishes colours more easily than characters, numbers or symbols.

Doctors' surgeries have long understood the advantages of lateral filing. The colour-coded labels on the spines of the files makes them immediately visible and accessible, not to mention saving space and making filing much more efficient.

We also have an extensive range of office cabinetry, from single space-saving units to compact floor-to-ceiling rolling cabinets for the largest organisation.

So, help your customers get a bit of colour into their office, with AVERY Shelf Lateral Filing.

To really see how the benefits of Lateral Filing stand out, request a sales pack by emailing [marketing-au@ap.averydennison.com](mailto:marketing-au@ap.averydennison.com)
